SUMMARY

Full Stack Developer with 3 years of experience in Node.js, React, and MongoDB. Proficient in designing and developing scalable and secure web applications. Expertise in optimizing API response times, enhancing system performance, and implementing client-specific features.

EXPERIENCE

Backend Developer

Nathan Digital

08/2023 - Present Dubai, U.A.E

- Worked on developing **Nathan Digital's HRMS** Backend using **Node.js** and **MongoDB**
- Customized **HRMS** features tailored to client requirements, including features such as leave applications, claims requests, and attendance reports
- Developed comprehensive downloadable **reports** leveraging **MongoDB aggregation** tools for insightful employee data analysis
- Reduced **API response** time by **50-60%** through efficient data processing using **MongoDB pipelines**
- **Automated** data integration from third-party sources such as Workday, Azure AD etc. into the HRMS system to streamline data feeding
- Implemented **Active Directory SSO** for seamless user authentication
- Integrated **APIs of biometric devices** to automate attendance logging and management
- Utilized tools such as **SFTP, AWS S3, SES** in the HRMS for enhanced functionality
- Implemented an **email queuing system** by utilizing **Redis**

Software Developer

Gitbitz Software Pvt Ltd

03/2023 - 07/2023 Kozhikode, India

- Developed and maintained backend API routes for a Dubai-based real estate company's property finding website using **Node.js** and **TypeScript**
- Worked with multiple libraries in **React Ecosystem** such as Formik, React Table etc. to implement functionalities such as forms, tables, layouts etc
- Assisted in building an admin panel frontend for the client with user-friendly tables and forms to enable efficient management of the data, utilized **React** and **Tailwind CSS**
- Continued development of the company's own product, FixBrix, a construction project management software, utilizing **React** and **Node.js.**
- Worked on enhancing FixBrix by developing new features such as issue tracking and task planning, improving the overall functionality of the application.

Trainee Engineer

Colt Technology Services

08/2022 - 02/2023 Bangalore, India

- Completed training and enhanced knowledge in various aspects of Full Stack development including technologies such as **React, Node.js, Git** and **SQL**
- Collaborated in development of the Backend of in-house **HR Information System**
- Wrote SQL queries to efficiently retrieve and manipulate data for the System
- Refactored API routes in **Node.js** to improve system functionality

Software Developer

Gitbitz Software Pvt Ltd

09/2021 - 06/2022 Kozhikode, India

- Contributed to the development of **Fixbrix**, an advanced Construction Project Management software
- Developed multiple **User Interfaces** for Fixbrix in **React**, enhancing user experience and functionality
- Designed and implemented **RESTful APIs** in **Node.js** to efficiently retrieve and manage data for clients, employees, projects, and more from a **MySQL** database

SKILLS

Node.js **React** **MongoDB** **Express.js**
HTML **CSS** **Javascript** **SQL** **Git**
REST API **GitHub** **BitBucket** **Python**
Postman **Jira** **VS Code** **Single Sign On**
AWS S3 **AWS SES**

EDUCATION

Bachelor of Engineering in Computer Science

JSS Academy of Technical Education

08/2018 - 07/2022 Bangalore, India

12th, Science, CBSE

Delhi Public School East

06/2017 - 05/2018 Bangalore, India
